

LIFT. SUPPORT. MOVE.

The **DEKRA-certified adapter** that turns standard **EN 1065 construction & formwork props** into a mobile load-lifting system for **up to 3.3 t** – rugged, compact and cost-efficient.

3.3 t

LOAD CAPACITY

4.0 m

SYSTEM HEIGHT

1

PERSON SET-UP

THE SYSTEM

Head plate + 3 base elements

Simply mounted onto existing standard props – self-stabilising, no guying.

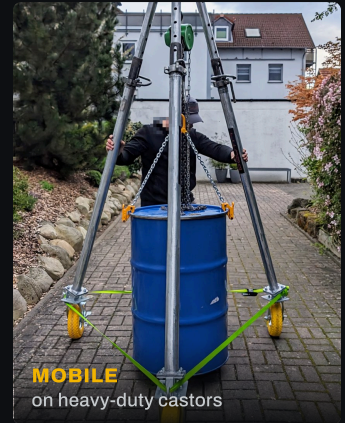

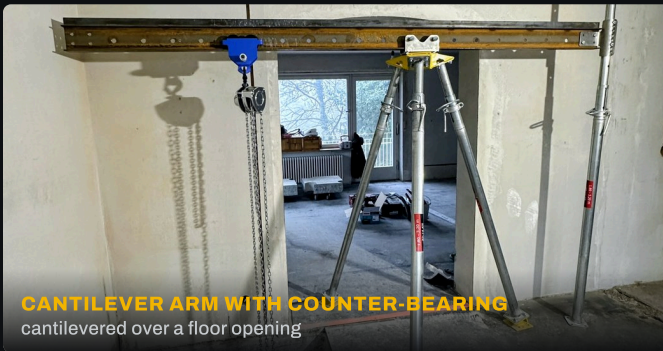

LANDSCAPING
Pulling roots & stumps

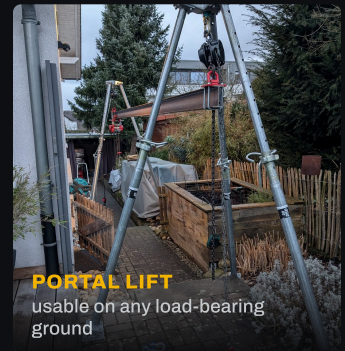

CONSTRUCTION & CIVIL ENG.
Lifting & setting components

MOBILE
on heavy-duty castors

CANTILEVER ARM WITH COUNTER-BEARING
cantilevered over a floor opening

PORTAL LIFT
usable on any load-bearing ground

WHY BAUTRI WORK?

-  **Self-stabilising**
Stable – without elaborate guying.
-  **Quickly set up**
By one person, in minutes.
-  **Minimal training**
Simple & safe to handle.
-  **Cost-efficient**
Uses standard EN 1065 props.

 Developed in Germany. Manufactured by **Form-on** – part of the **DOKA Group**, a world leader in formwork components.

 For material loads only — no personal fall protection. For that, use the **Batri System Rescue**.
